

Ready Global Academy

School Course Calendar: 2025-2026

Goals and Philosophy

Our secondary school programs are designed to equip students with the knowledge and skills they will need to lead satisfying and productive lives. The programs are intended to prepare students for further education and work, and to assist them in becoming independent, productive, and responsible members of society. Ready Global Academy has been organized to provide as broad a scope of programs as possible to all students and, at the same time, to deal effectively with the special needs and interests of students.

Ready Global Academy is organized to provide students with opportunities to pursue combinations of Academic, Business, and Technological Studies, as well as courses in the Arts, Physical and Health Education and Career Education. Ready Global Academy is committed to helping students acquire the knowledge, skills, values and attitudes, which are useful both now and in later life.

The Importance and Value of Completing a Secondary Education

Education is ultimately the vehicle that drives societies and communities to prosper and succeed. We live in a knowledge-based society, where the continuous collection and understanding of information is essential to succeed in this ever-changing global economy. One has to constantly update his/her skills and abilities of interpreting and understanding information. Secondary education allows an individual to obtain the fundamental skills and abilities necessary to understand complex information. It provides students with the analytical skills necessary to pursue a wide-range of career objectives.

The Requirement to Remain in Secondary School until 18 or Obtained OSSD

Under Ontario's Education Amendment Act (Learning to Age 18), 2006, the compulsory learning age is raised to 18 or until a student graduates. Students must continue in school or participate in an approved "equivalent learning" option such as an apprenticeship or workplace training program until they graduate or turn 18. This is to encourage more students to graduate and fewer to leave school without adequate preparation for work or further studies.

School Organization

There are defined semesters at our school. The schedule for these semesters is communicated to all stakeholders in a timely manner. Semester 1, 2 and a summer semester.

Ontario Secondary School Diploma: If you started Grade 9 in 2023 (or previously)

In order to earn the Ontario Secondary School Diploma a student must:

- Earn 18 compulsory credits
- Earn 12 additional optional credits
- Complete 40 hours of community involvement activities
- Successfully meet the Ontario provincial literacy requirement
- At least 2 online learning credits

Compulsory Credits:

Students must earn the following compulsory credits in order to obtain the Ontario Secondary School Diploma:

4 credits in English (1 credit per grade)

- The Ontario Secondary School Literacy Course (OSSLC) may be used as an additional English credit (to meet either the Grade 11 or 12 English credit) or a Group 1 compulsory credit.
- The Grade 11 Contemporary Aboriginal Voices course may be used to meet the Grade 11 English compulsory credit requirement.
- For English language learners, the requirement may be met through earning a maximum of 3 credits in English as a second language (ESL) or English literacy development (ELD); the fourth credit must be a Grade 12 compulsory English course.

3 credits in mathematics (at least 1 credit in Grade 11 or 12)

2 credits in science

1 credit in the arts

- The Grade 9 Expressing Aboriginal Cultures course may be used to meet the compulsory credit requirement in the arts.

1 credit in Canadian geography (Grade 9)

1 credit in Canadian history (Grade 10)

1 credit in French as a second language

- Students who have taken Native languages in place of French as a second language in elementary school may use a Level 1 or 2 Native language course to meet the compulsory credit requirement for French as a second language.

1 credit in health and physical education

0.5 credit in career studies

0.5 credit in civics

3 additional credits, consisting of 1 credit from each of the following groups:

- **Group 1:** English (including the Ontario Secondary School Literacy Course), French as a second language, classical languages, international languages, Native languages, Canadian and world studies, Native studies, social sciences and humanities, guidance and career education, cooperative education
- **Group 2:** French as a second language, the arts, business studies, health and physical education, cooperative education
- **Group 3:** French as a second language, science (Grade 11 or 12), computer studies, technological education, cooperative education

Note: The following conditions apply to selections from the above three groups:

- A maximum of 2 credits in French as a second language may count as additional compulsory credits, 1 credit from Group 1, and 1 credit from either Group 2 or Group 3.
- A maximum of 2 credits in cooperative education may count as additional compulsory credits,

selected from any of Groups 1, 2, or 3.

Optional Credits:

In addition to the 18 compulsory credits (7 for the OSSC), students must earn 12 optional credits (7 for the OSSC). Students may earn these credits by successfully completing courses that they have selected from the courses listed as available at Ready Global Academy.

Ontario Secondary School Diploma: If you started Grade 9 in 2024 (or later)

In order to earn the Ontario Secondary School Diploma a student must:

- Earn 17 compulsory credits
- Earn 13 additional optional credits
- Complete 40 hours of community involvement activities
- Successfully meet the Ontario provincial literacy requirement
- At least 2 online learning credits

Starting Grade 9 in 2024 (or later), you need the following to get your OSSD.

Compulsory Credits:

You need the following 17 compulsory credits to get your OSSD:

- 4 credits in English (1 credit per grade)
- 3 credits in mathematics (Grade 9, Grade 10 and 1 credit in Grade 11 or 12)
- 2 credits in science
- 1 credit in technological education (Grade 9 or Grade 10)
- 1 credit in Canadian history (Grade 10)
- 1 credit in Canadian geography (Grade 9)
- 1 credit in the arts
- 1 credit in health and physical education
- 1 credit in French as a second language
- 0.5 credit in career studies
- 0.5 credit in civics and citizenship
- 1 credit from the STEM-related course group

The following apply to compulsory credit selections:

- You can use the Grade 11 English: Understanding Contemporary First Nations, Métis and Inuit Voices course to meet the Grade 11 English compulsory credit requirement.
- You can use the Grade 9 Expressions of First Nations, Métis, and Inuit Cultures course to meet the compulsory credit requirement in the arts.
- STEM-related course group

Of the 17 Compulsory Credits, you must complete 1 from the following STEM group:

- business studies
- computer studies

- cooperative education
- mathematics (in addition to the 3 compulsory credits currently required)
- science (in addition to the 2 compulsory credits currently required)
- technological education (in addition to the 1 compulsory credit required)

Optional Credits:

- You must earn 13 optional credits by successfully completing courses from your school's program and course calendar.

Online Learning Graduation Requirement Opt-Out Process

As part of the Ontario Ministry of Education's mandate, parents and guardians of students currently in grades 9-11 may choose to opt-out of the mandatory online learning courses required for graduation from secondary school. If you have a child, who is currently enrolled in Grades 9-11, and would like to opt them out of mandatory online learning courses in secondary school, please contact our school in order to obtain the Online Learning Opt-Out Form. Once this form is complete, please return it to Ready Global Academy office. Only hard copies of the Online Learning Opt-Out Form will be accepted. The submitted form will be subsequently stored in the respective student's Ontario Student Record (OSR).

NOTE: If you do not wish to opt-out of mandatory online courses, you do not need to complete this form.

The Ontario Secondary School Certificate (OSSC)

The Ontario Secondary School Certificate (OSSC) will be granted, on request, to students who are leaving secondary school upon reaching the age of eighteen without having met the requirements for the Ontario Secondary School Diploma. To be granted an OSSC, a student must have earned a minimum of 14 credits, distributed as follows.

7 required compulsory credits

- 2 credits in English
- 1 credit in mathematics
- 1 credit in science
- 1 credit in Canadian history or Canadian geography
- 1 credit in health and physical education
- 1 credit in the arts, computer studies, or technological education

7 required optional credits

- 7 credits selected by the student from available courses

The substitution policy for OSSC compulsory credits is the same as that for the OSSD.

The Certificate of Accomplishment

Students who are leaving secondary school upon reaching the age of eighteen without having met the requirements for the Ontario Secondary School Diploma or the Ontario Secondary School Certificate may be granted a Certificate of Accomplishment. The Certificate of Accomplishment may be a useful means of recognizing achievement for students who plan to take certain kinds of further training, or who plan to find employment directly after leaving school. The Certificate of Accomplishment is to be accompanied by the student's Ontario

Student Transcript. For students who have an Individual Education Plan (IEP), a copy of the IEP may be included.

Students who return to school to complete additional credit and non-credit courses (including courses with modified or alternative expectations in special education programs) will have their transcript updated accordingly but will not be issued a new Certificate of Accomplishment. The Ontario Secondary School Diploma or Ontario Secondary School Certificate will be granted when the returning student has fulfilled the appropriate requirements.

List of Available Courses

Students study the following courses at Ready Global Academy:

ASM4M	Media Arts, Grade 12 University/College Preparation
AVI3M	Visual Arts, Grade 11, University Preparation
AVI4M	Visual Arts, Grade 12, University Preparation
AWQ3M	Visual Arts, Photography, Grade 11, University Preparation
AWQ4M	Visual Arts, Photography, Grade 12, University Preparation
BBB4M	International Business Fundamentals, Grade 12, University/College Preparation
BEM1O	Building the Entrepreneurial Mindset, Grade 9, Open
BEP2O	Launching and Leading a Business, Grade 10, Open
BOH4M	Business Leadership: Management Fundamentals, Grade 12, University Preparation
CGC1W	Exploring Canadian Geography, Grade 9, De-streamed
CGW4U	World Issues: A Geographic Analysis, Grade 12, University Preparation
CHC2D	Canadian History Since World War 1, Grade 10, Academic
CHI4U	Canada: History, Identity, and Culture, Grade 12, University Preparation
CHV2O	Civics and Citizenship, Grade 10, Open
CIA4U	Analysing Current Economic Issues, Grade 12, University Preparation
CLN4U	Canadian and International Law, Grade 12, University Preparation
CPW4U	Canadian and International Politics, Grade 12, University Preparation

ENL1W	English, Grade 9, De-streamed
ENG2D	English, Grade 10, Academic
ENG2P	English, Grade 10, Applied
ENG3C	English, Grade 11, College Preparation
ENG3U	English, Grade 11, University Preparation
ENG4C	English, Grade 12, College Preparation
ENG4U	English, Grade 12, University Preparation
ESLAO	English as a Second Language ESL, Level 1, Open
ESLBO	English as a Second Language ESL, Level 2, Open
ESLCO	English as a Second Language ESL, Level 3, Open
ESLDO	English as a Second Language ESL, Level 4, Open
ESLEO	English as a Second Language ESL, Level 5, Open
ETS3M	Canadian Literature, Grade 11, University/College Preparation
ETS4U	Studies in Literature, Grade 12, University Preparation
EW4U	The Writer's Craft, Grade 12, University Preparation
GLC2O	Career Studies, Grade 10, Open
GLS1O	Learning Strategies 1: Skills for Success in Secondary School, Grade 9, Open
HFA4U	Nutrition and Health, Grade 12, University Preparation
HHG4M	Human Development throughout the Lifespan, Grade 12 University/College
HSB4U	Challenge and Change in Society, Grade 12, University Preparation
HSP3U	Introduction to Anthropology, Psychology, and Sociology, Grade 11, University Preparation
ICS3U	Introduction to Computer Science, Grade 11, University Preparation
ICS4U	Computer Science, Grade 12, University Preparation
LKMDU	International Languages, Mandarin, Level 3, University Preparation

LKBDU	International Languages, Simplified Mandarin, Level 3, University Preparation
MCR3U	Functions, Grade 11, University Preparation
MCV4U	Calculus and Vectors, Grade 12, University Preparation
MDM4U	Mathematics of Data Management, Grade 12, University Preparation
MFM2P	Foundations of Mathematics, Grade 10, Applied
MHF4U	Advanced Functions, Grade 12 University Preparation
MTH1W	Mathematics, Grade 9, De-streamed
MPM2D	Principles of Mathematics, Grade 10, Academic
NBE3U	English: Understanding Contemporary First Nations, Métis, and Inuit Voices, Grade 11, University Preparation
OLC4O	Ontario Literacy Course, Grade 12, Open
PPL1O	Healthy Active Living Education, Grade 9, Open
SBI3U	Biology, Grade 11, University Preparation
SBI4U	Biology, Grade 12, University Preparation
SCH3U	Chemistry, Grade 11, University Preparation
SCH4U	Chemistry, Grade 12, University Preparation
SNC1W	Science, Grade 9, De-streamed
SNC2D	Science, Grade 10, Academic
SPH3U	Physics, Grade 11, University Preparation
SPH4U	Physics, Grade 12, University Preparation

Curriculum documents for all secondary courses can be accessed online at the following URL:

<https://www.dcp.edu.gov.on.ca/en/curriculum#secondary>

Course outlines for all courses offered at Ready Global Academy are given to students registered in the course and can also be obtained upon request to the principal.

Community Involvement

As part of the Ontario Secondary School Diploma requirements, students must complete a minimum of 40 hours of community involvement activities. The purpose of this activity is to remind students of their community obligations and to encourage them to contribute to society beyond the minimum number of hours required as well as to continue to make a selfless contribution to their community in the future.

Students are responsible for completing the required number of hours on their own time – during lunch hour, after school, on weekends, or during school holidays – and for keeping track of their activities under the guidance of Ready Global Academy principal. Students must choose an activity that is approved by Ready Global Academy such as helping classmates with school work, assisting in sports activities at a community centre, helping senior citizens, involvement in community events, volunteering at a hospital or in the community.

Student activities are not to displace workers or to be during scheduled classroom time. Grade 8 students are allowed to start their volunteer hours when they complete their Grade 8 academic studies.

Approved Activities:

Students can seek opportunities in the community by offering assistance to service clubs, community groups, charities, conservation groups, health agencies and others. For example:

- Fundraising (not-for-profit organizations)
- Community sports coaching
- Helping to organize community events
- Participating in environmental projects
- Assisting Seniors
- Participating on committees
- Participating on community project

Ineligible Activities:

- Any activity where you are paid
- Co-operative education experiences
- Any required activities of a course or program
- Playing on a school or recreational sports team
- Activities which are regular family responsibilities
- Court-ordered community service programs
- Alternative measures program
- Any diversionary program that uses community service
- Any activity in an unsafe, unsupervised environment

The Secondary School Literacy Graduation Requirement

To meet Ontario's literacy graduation requirement, students must either pass the Ontario Secondary School Literacy Test (OSSLT) or complete the Ontario Secondary School Literacy Course (OSSLC); mature students may enrol directly in the OSSLC without taking the test first.

The OSSLT is administered online during windows set by EQAO. Passing the test is a requirement of the OSSD. Students who do not pass may take the Ontario Secondary School Literacy Course (OSSLC). Ready Global Academy principal has the discretion to allow a student to enroll in the OSSLC before he or she has had a second opportunity to take the OSSLT, if the principal determines that it is in the best educational interests of the student. Students who pass the course are considered to have met the literacy graduation requirement. The literacy requirements are in the best interest of the students. The result is recorded on the student transcript.

Accommodations

The accommodations provided for students writing the OSSLT are in the categories of:

- Setting
- Time
- Presentation Format (formats for administration of test)
- Response Format (permitted formats for student responses)
- Audio Recording of Responses
- Verbatim Scribing of responses
- Video Recording of Responses (reading only)

Deferrals

The student who is working toward an OSSD but will not participate in the test, because:

- The student is an English language learner and has not yet acquired a level of proficiency in English sufficient to participate.
- The student has been identified as exceptional by an Identification, Placement and Review Committee and would not be able to participate in the test even if all accommodations were provided.
- The student has not yet acquired the reading and writing skills appropriate for Grade 9 or
- The student has a temporary condition owing to illness or injury (e.g., a broken arm) or is new to Ready Global Academy, and appropriate accommodations cannot be provided.

To make a deferral decision it must be done:

- Prior to the test.
- For each student individually and in consultation with the student and parents or guardians or the adult student, and with the appropriate teaching staff.

Exemption

The student is not working toward an OSSD (and this is indicated in the IEP).

To make an exemption decision must be done:

- Prior to the test.
- For each student individually and in consultation with the student and parents or guardians or adult student, with the appropriate teaching staff and with the consent of the parents or guardians or adult student.

Substitutions for Compulsory Credits

To allow flexibility in designing a student's program and to ensure that all students can qualify for the secondary school diploma, substitutions may be made for a limited number of compulsory courses. These substitution courses must be selected from the course offerings of Ready Global Academy that meet the requirements for compulsory credits. To meet individual students' needs, the principal may replace up to three of these courses (or the equivalent of half courses) with the courses that meet the compulsory credit requirements. Each substitution will be noted on the student's Ontario Student Transcript.

Prerequisite Courses

A prerequisite course is identified by the Ministry of Education guidelines as being essential preparation for a particular course that follows. At Ready Global Academy, students must complete the prerequisite identified for the course they wish to register for. A proof of prerequisite completion is mandatory prior to course registration.

Waiving Prerequisites

If a student requests that a prerequisite be waived, the principal will determine whether or not the prerequisite should be waived. The principal may also initiate consideration of whether a prerequisite should be waived. The principal will make their decision in consultation with the parents and appropriate school staff. The principal's decision is final and there is no further avenue of appeal. As part of the consideration of whether the prerequisite may be waived, the student may be asked to take a special test or examination.

Credit System and Courses

The Credit System:

A credit is granted in recognition of the successful completion of a course that has been scheduled for a minimum of 110 hours of classroom instruction with the student achieving a mark of 50% or higher. Credits are granted to students by Ready Global Academy principal, on behalf of the Minister of Education.

Types of Courses:

Ontario credit courses have a common course code system: e.g., ENG4U, BBB4M

1. The first 3 characters represent the course name: e.g., ENG = English, BBB=Introduction to International Business.
2. The 4th Character indicates the grade or language level: e.g., 1=Grade 9; 2=Grade 10; A=Level
3. The last character indicates the course type: e.g., C= College; D= Academic; M= College; University; U= University or W = De-streamed.

The following three types of courses are offered in Grades 9:

- Open courses, which comprise a set of expectations that are appropriate for all students, are designed to broaden students' knowledge and skills in subjects that reflect their interests and prepare them for active and rewarding participation in society. They are not designed with the specific requirements of university, college, or the workplace in mind (Example: ATC1O).

- De-streamed, as a result of feedback from education stakeholders and partners this type of course has been designed with a set of expectations that are appropriate for all students, are designed to broaden students' knowledge and skills in subjects that reflect their interests and prepare them for active and rewarding participation in society (Example: CGC1W).

The following three types of courses are offered in 10:

- Academic courses develop students' knowledge and skills through the study of theory and abstract problems. These courses focus on the essential concepts of a subject and explore related concepts as well. They incorporate practical applications as appropriate (Example: ENG2D).
- Applied courses focus on the essential concepts of a subject and develop students' knowledge and skills through practical applications and concrete examples. Familiar situations are used to illustrate ideas, and students are given more opportunities to experience hands-on applications of the concepts and theories they study (Example: MFM2P).
- Open courses, which comprise a set of expectations that are appropriate for all students, are designed to broaden students' knowledge and skills in subjects that reflect their interests and prepare them for active and rewarding participation in society. They are not designed with the specific requirements of university, college, or the workplace in mind (Example: GLC2O).

The following five types of courses are offered in Grades 11 and 12:

- College preparation courses are designed to equip students with the knowledge and skills they need to meet the entrance requirements for most college programs or for admission to specific apprenticeship or other training programs (Example: BDI3C).
- University preparation courses are designed to equip students with the knowledge and skills they need to meet the entrance requirements for university programs (Example: MCV4U).
- University/college preparation courses are designed to equip students with the knowledge and skills they need to meet the entrance requirements for specific programs offered at universities and colleges (Example: BBB4M).
- Workplace preparation courses are designed to equip students with the knowledge and skills they need to meet the expectations of employers, if they plan to enter the workforce directly after graduation, or the requirements for admission to certain apprenticeship or other training programs (Example: BAN4E).
- Open courses, which comprise a set of expectations that are appropriate for all students, are designed to broaden students' knowledge and skills in subjects that reflect their interests and prepare them for active and rewarding participation in society. They are not designed with the specific requirements of university, college, or the workplace in mind (Example: CPC3O).

Changing Course Types

Grades 10 to 12, a student may change to a different type of course in a given subject provided that the student has taken any course specified as a prerequisite for that course. If the student has not done so, he or she may take one of the specified prerequisite courses through summer school, night school, e-learning, the Independent Learning Centre, or independent study.

If the principal believes that a student can be successful in a particular course without having taken the specified prerequisite course, he or she may waive the prerequisite.

Cooperative Education

Ready Global Academy may provide students with the opportunity to extend their knowledge through cooperative education programs. Cooperative education may be the culmination of a series of experiential learning opportunities that include job shadowing, job twinning, and work experience.

A cooperative education course is based on a related course (or courses) from an Ontario curriculum policy document in which the student is enrolled or which he or she has successfully completed. The cooperative education course and the related course (or courses) together constitute a student's cooperative education program, designed to suit the student's strengths, interests, and needs and to enhance the student's preparation for the future.

Cooperative education courses include a classroom component, comprising pre-placement and integration activities, and a placement component.

The cooperative education teacher will develop the student PPLP.

Cooperative education will not be provided during this academic year.

Remedial Programs

When necessary, Ready Global Academy will provide its students with tutoring services (online or on-site).

For the purpose of remediation, the principal may decide to add instructional hours to a course, in addition to the mandated 110 hours of instruction.

Ready Global Academy operates a summer school during the months of July and August. Students who would like to repeat courses or upgrade marks may attend Ready Global Academy during this time. All summer school courses must not begin before July 1st and be completed by no later than August 31st of the same year.

Achievement - Curriculum Expectations

The expectations, or content standards identified for each course describe the knowledge and skills that students are expected to develop and demonstrate in their class work, on assessments, and in various other activities on which their achievement is assessed and evaluated. Two sets of expectations are listed for each strand (or broad curriculum area) of every course – overall expectations and specific expectations. The ***overall expectations*** describe in general terms the knowledge and skills that students are expected to demonstrate by the end of each course. The ***specific expectations*** describe the expected knowledge and skills in greater detail. Taken together, the overall and specific expectations represent the mandated curriculum.

Assessment and Evaluation of Student Achievement

The primary purpose of assessment and evaluation is to improve student learning. Assessment is the process of gathering information from a variety of sources (student products such as assignments and tests, observations of student performance, and conversations with students) that accurately reflects how well a student is achieving the curriculum expectations. Evaluation

is the process of judging the quality of a student's work on the basis of established achievement criteria, or performance standards and assigning a level of achievement to represent that quality.

Assessment and evaluation will be based on the content standards and the performance standards outlined in this document and in the curriculum policy document for each discipline.

All curriculum expectations must be accounted for in instruction, but evaluation focuses on students' achievement of the overall expectations. A student's achievement of the overall expectations is evaluated on the basis of his or her achievement of related specific expectations. The overall expectations are broad in nature, and the specific expectations define the particular content or scope of the knowledge and skills referred to in the overall expectations. Teachers will use their professional judgement to determine which specific expectations should be used to evaluate achievement of the overall expectations, and which ones will be covered in instruction and assessment but not necessarily evaluated.

Growing Success: Assessment, Evaluation, and Reporting in Ontario Schools outlines the policies and practices for the assessment, evaluation, and reporting of the achievement of curriculum expectations and the development of learning skills and work habits for all students in Grades 1 to 12 in Ontario schools. The policy is based on seven fundamental principles designed to ensure that assessment, evaluation, and reporting practices and procedures:

- *are fair, transparent, and equitable for all students.*
- *support all students, including students with special education needs, those who are learning the language of instruction, and those who are First Nation, Métis, or Inuit.*
- *are carefully planned to relate to the curriculum expectations and learning goals and, as much as possible, to the interests, learning styles and preferences, needs, and experiences of all students.*
- *are communicated clearly to students and parents at the beginning of Ready Global Academy year or course and at other appropriate points throughout Ready Global Academy year or course.*
- *are ongoing, varied in nature, and administered over a period of time to provide multiple opportunities for students to demonstrate the full range of their learning.*
- *provide ongoing descriptive feedback that is clear, specific, meaningful, and timely to support improved learning and achievement.*
- *develop students' self-assessment skills to enable them to assess their own learning, set specific goals, and plan next steps for their learning.*

Evaluation is based on gathering evidence of student achievement through:

- Products
- Observations
- Conversations

Assessment for Learning - we provide feedback and coaching

Assessment FOR Learning is the process of seeking and interpreting evidence for the use of learners and their teachers to decide where the learners are in their learning, where they need to go, and how best to go there.

Assessment as Learning - we help students monitor progress, set goals, reflect on their learning
Assessment AS Learning is the process of the explicit fostering of students' capacity over time to be their own best assessors, but teachers need to start by presenting and modelling external, structured opportunities for students to assess themselves.

Assessment of Learning – we use assessments as ways of providing evaluative statements about the level of achievement of students

Assessment OF Learning is the assessment that becomes public and results in statements of symbols (marks/grades/levels of achievement) about how well students are learning. It often contributes to pivotal decisions that will affect students' future.

Performance Standards

Levels or degrees of achievement are organized into broad learning categories. These include communication, knowledge/understanding, application and thinking. While they are broad in scope and general in nature, the achievement levels serve as a guide for gathering information and act as a framework used to assess and evaluate each student's achievement. As such, they enable teachers to make consistent judgments about the quality of work and provide clear and specific information about their achievement to students and their parents.

A final grade is recorded for every course, and a credit is granted and recorded for every course in which the student's grade is 50% or higher. The final grade in the form of a percentage grade for each course will be determined as follows:

- Seventy per cent of the grade will be based on evaluations conducted throughout the course. This portion of the grade should reflect the student's most consistent level of achievement throughout the course, although special consideration should be given to more recent evidence of achievement.
- Thirty per cent of the grade will be based on a final evaluation in the form of an examination, performance, essay, culminating activity and/or other method of evaluation suitable to the course content and administered towards the end of the course.

The achievement chart identifies four categories of knowledge and skills. It is a standard province-wide guide to be used by teachers. It enables teachers to make judgements about student work that are based on clear performance standards and on a body of evidence collected over time. The purpose of the achievement chart is to:

- Provide a common framework that encompasses all curriculum expectations for
- All courses outlined in this document.
- Guide the development of quality assessment tasks and tools (including rubrics);

- Help teachers to plan instruction for learning.
- Assist teachers in providing meaningful feedback to students.
- Provide various categories and criteria with which to assess and evaluate students' learning.

Categories of Knowledge and Skills

The categories, defined by clear criteria, represent four broad areas of knowledge and skills within which the subject expectations for any given course are organized. The four categories should be considered as interrelated, reflecting the wholeness and interconnectedness of learning. The categories of knowledge and skills are: Knowledge and Understanding, Thinking, Communication, and Application.

Teachers will ensure that student work is assessed and/or evaluated in a balanced manner with respect to the four categories, and that achievement of particular expectations is considered within the appropriate categories.

The categories of knowledge and skills are described in *Growing Success: Assessment, Evaluation, and Reporting in Ontario Schools*, as follows:

Knowledge and Understanding	Subject-specific content acquired in each grade/course (knowledge), and the comprehension of its meaning and significance (understanding).
Thinking	The use of critical and creative thinking skills and/or processes
Communication	The conveying of meaning through various text forms.
Application	The use of knowledge and skills to make connections within and between various contexts.

Report Cards

At the end of each course a Report Card will be given to the student with the percentage final grade achieved, credit earned, attendance details and a record of the learning skills demonstrated by the student. Students, and the homeschool, receive a mid-term report when they have completed half of their course of study.

Semestered schools are required to provide formal written reports to parents two times per semester. Non-semestered schools are required to provide formal written reports to parents three times a year. The first report must be issued during the fall. Schools that offer a combination of semestered and non-semestered courses should develop a combined reporting schedule that provides for two written reports for semestered courses and three written reports for non-semestered courses.

Report cards will include evaluation of students' Learning Skills and Work habits as follows:

Learning Skills and Work Habits

<u>Responsibility</u>	<u>Organization</u>
• Fulfils responsibilities and commitments within the learning environment. • Completes and submits class work, homework, and assignments according to agreed-upon timelines. • Takes responsibility for and manages own behaviour.	• Devises and follows a plan and process for completing work and tasks. • Establishes priorities and manages time to complete tasks and achieve goals. • Identifies, gathers, evaluates, and uses information, technology, and resources to complete tasks.
<u>Independent Work</u>	<u>Collaboration</u>
• Independently monitors, assesses, and revises plans to complete tasks and meet goals. • Uses class time appropriately to complete tasks. • Follows instructions with minimal supervision.	• Accepts various roles and an equitable share of work in a group. • Responds positively to the ideas, opinions, values, and traditions of others. • Builds healthy peer-to-peer relationships through personal and media-assisted interactions. • Works with others to resolve conflicts and build consensus to achieve group goals. • Shares information, resources, and expertise, and promotes critical thinking to solve problems and make decisions.
<u>Initiative</u>	<u>Self-Regulation</u>
• Looks for and acts on new ideas and opportunities for learning. • Demonstrates the capacity for innovation and a willingness to take risks • Demonstrates curiosity and interest in learning • Approaches new tasks with a positive attitude. • Recognizes and advocates appropriately for the rights of self and others.	• Sets own individual goals and monitors progress towards achieving them. • Seeks clarification or assistance when needed. • Assesses and reflects critically on own strengths, needs, and interests. • Identifies learning opportunities, choices, and strategies to meet personal needs and achieve goals. • Perseveres and makes an effort when responding to challenges.
E – Excellent G – Good S – Satisfactory N – Needs Improvement	

Percentage Mark	Achievement of the Provincial Curriculum Expectations
80-100	The student has demonstrated the required knowledge and skills with a high degree of effectiveness. Achievement surpasses the provincial standard. (Level 4)
70-79	The student has demonstrated the required knowledge and skills with considerable effectiveness. Achievement meets the provincial standard. (Level 3)
60-69	The student has demonstrated the required knowledge and skills with some effectiveness. Achievement approaches the provincial standard. (Level 2)
50-59	The student has demonstrated the required knowledge and skills with limited effectiveness. Achievement falls much below the provincial standard. (Level 1)
Below 50	The student has not demonstrated the required knowledge and skills. Extensive remediation is required.
I	Insufficient evidence to assign a percentage mark (for Grade 9 and Grade 10 courses only)
W	The student has withdrawn from the course.

Prior Learning Assessment and Recognition

Prior Learning Assessment and Recognition (PLAR) is the formal evaluation and credit-granting process whereby students may obtain credits for prior learning. Prior learning includes the knowledge and skills that students have acquired, in both formal and informal ways, outside an Ontario Secondary School. Students may have their knowledge and skills evaluated against the expectations outlined in provincial curriculum policy documents in order to earn credits towards the secondary school diploma. PLAR Challenge and Equivalency may be granted by the principal according to Ministry guidelines for PLAR, and Ready Global Academy procedure manual. Ontario's PLAR policy is governed by two memoranda. PPM 129 applies to regular day-school students in Grades 9–12 and explicitly does not apply to mature students. PPM 132 sets the mandatory PLAR requirements for mature students, recognizing adults' prior formal and informal learning. Ready Global Academy's PLAR program follows these policies by offering both an equivalency process—assessing credentials from other jurisdictions—and a challenge process where students demonstrate prior learning to earn credits. Ready Global Academy does not offer PLAR.

Reporting

Ontario Student Record (OSR)

The Ontario Student Record (OSR) is the record of a student's educational progress through schools in Ontario. The Education Act requires that the principal of a school collect information “for inclusion in a record in respect of each pupil enrolled in Ready Global Academy and to establish, maintain, retain, transfer and dispose of the record”. The act also regulates access to an OSR and states that the OSR is “privileged for the information and use of supervisory officers

and the principal and teachers of Ready Global Academy for the improvement of instruction” of the student. Each student and the parent(s) of a student who is not an adult (that is, a student who is under the age of eighteen) must be made aware of the purpose and content of, and have access to, all of the information contained in the OSR.

Ontario Student Transcript (OST)

The Ontario Student Transcript (OST) was developed in 1983 to provide an official and consistent record of the Ontario secondary school credit courses successfully completed by a student.

Since the 1999–2000 school year, schools have been required to provide a complete record of students’ performance in Grade 11 and 12 courses.¹ Under this requirement, both successful and unsuccessful attempts at completing Grade 11 and 12 courses must be recorded on the OST. The OST will include:

- all Grade 9 and 10 courses successfully completed by the student, with percentage grades obtained and credits earned;
- all Grade 11 and 12 courses completed or attempted by the student, with percentage grades obtained and credits earned;
- all equivalent credits granted through the Prior Learning Assessment and Recognition (PLAR) equivalency process under OSS or through the equivalency process under OSIS;
- all Grade 10 courses for which the student successfully challenged for credit through the PLAR challenge process, with percentage grades obtained and credits earned;
- all Grade 11 and 12 courses for which the student successfully or unsuccessfully challenged for credit through the PLAR challenge process, with percentage grades obtained and credits earned;
- identification of compulsory credits, including credits that are substitutions for compulsory credits identified by the ministry as diploma requirements;
- confirmation that the student has completed the forty hours of community involvement;
- confirmation that the student has successfully completed the provincial secondary school literacy requirement.

Full Disclosure

If a student (including a student with an Individual Education Plan) withdraws from a Grade 11 or 12 course within five instructional days following the issue of the first provincial report card in a semestered school or five instructional days following the issue of the second provincial report card in a non-semestered school, the withdrawal is not recorded on the OST.

If a student withdraws from a course after five instructional days following the issue of the first provincial report card in a semestered school or five instructional days following the issue of the second provincial report card in a non-semestered school, the withdrawal is recorded on the OST by entering a “W” in the “Credit” column. The student’s percentage grade at the time of the withdrawal is recorded in the “Percentage Grade” column.

No entry will be made on the OST if the student withdrew from a Grade 11 or Grade 12 course taken through a credit recovery program prior to submitting or completing the required culminating activity identified in the student’s learning plan.

Reporting Student Achievement to Parents

Regular progress reports will be provided to the parents of students who are under 18 years of age. Report cards will be provided to parents at the end of each course. Students, and the homeschool, receive a mid-term report when they have completed half of their course of study. Students who are 18 years of age and older will have to give permission to the teachers to communicate with their parents about their academic progress.

Student success is based also on their ability to maintain a high standard when it comes to learning skills and work habits in their regular studies. These are based on 6 established criteria. These are:

- Responsibility: The student is willing to act independently and make decisions without authorization.
- Organization: The student is able to plan, arrange, coordinate, administrate and management the workload.
- Independent Work: The student shows self-governance, self-determination and autonomy when independently completing all tasks.
- Collaboration: The student can effectively work with others to produce or create something.
- Initiative: The student can act to take charge and shows ingenuity, originality and enterprise.
- Self-Regulation: The student has control of oneself and can act independently

School Services

Computers

All school students must have access to reliable computers and internet.

Guidance

Assistance is given to students by helping them to understand their academic strengths and weaknesses, choosing appropriate-courses and in making application to post-secondary institutions. Ready Global Academy principal is also the guidance teacher.

Education and Career Planning Supports

When students begin at their studies at Ready Global Academy, they review with the principal their educational goals and become familiarized with the learning pathway form to best plan their educational direction. Upon completion of their studies, they will again sit with the principal to prepare a personalized transition plan either for their home-school, or post-secondary directions (university, college or the workplace).

Education Support for Parents

Parents and students may request a learning pathway form at any time to complete and review with the principal. They may also request to review curriculum documents, course descriptions and prerequisites and discuss their implications with the principal.

Student Accommodations and Modifications

At school, no modifications are made to any of the courses. Instructional, test and environmental accommodations may be given to students upon recommendation by the educational psychologist associated with our school.

English Language Learners

At school, teachers provide learning opportunities to enable English language learners to develop a proficiency in English. These opportunities are integrated into the curriculum in all subject areas. Teachers provide instructional programs, which address students' different levels of proficiency in English and help these students adjust to a new linguistic, cultural, and educational environment.

Library and Community Resources

Students are encouraged to use their local public libraries and their home-school library for their research projects.

Student Responsibilities

Guiding Principles

All members of Ready Global Academy community are to be treated with respect and dignity, especially persons in positions of authority. Responsible citizenship involves appropriate participation in the civic life of Ready Global Academy community. Active and engaged citizens are aware of their rights, but more importantly, they accept responsibility for protecting their rights and the rights of others.

Members of Ready Global Academy community are expected to use non-violent means to resolve conflict. Physically aggressive behavior is not a responsible way to interact with others.

The possession, use or threatened use of any object to injure another person endangers the safety of oneself and others. Alcohol and illegal drugs are addictive and present a health hazard. Ready Global Academy will respond strongly to school members who are in possession of, or under the influence of alcohol or illegal drugs. Insults, disrespect, and other hurtful acts disrupt learning and teaching in a school community. Members of Ready Global Academy community have a responsibility to maintain an environment where conflict and difference can be addressed in a manner characterized by respect and civility.

Student's achievements will be periodically reviewed with the student, teacher, and the principal. An action plan will be developed, if necessary, with the student's participation to help enhance the student's success. If the student is under the age of 18, the action plan will also be reviewed with, and signed by the parent.

Attendance

Regular attendance is necessary for success in any learning process. Persistent absenteeism makes it difficult for the student to demonstrate achievement of the curriculum expectations.

Attendance will be closely monitored. Persistent absence and lateness may result in withdrawal from the course or expulsion from Ready Global Academy. Students should carefully review Ready Global Academy attendance policy.

Students are also required to attend school until they reach the age of eighteen or graduate.

Academic Honesty

When students submit work to their teachers for evaluation, they imply that the work is the result of only their own efforts and is not in any way the result of the efforts of others. Academic honesty is essential for the development and acquisition of knowledge. Students who present the work of others as their own are guilty of plagiarism and will receive a mark of zero for the work and will have the details of the plagiarism noted in their school records. In principle, students who are guilty of cheating on tests or examinations will receive a mark of zero on the test or examination and have the details of the cheating noted in their school records. (The principal will review each case individually with reference to Ready Global Academy policy on Academic Honesty)

Code of Student Behaviour

A school is a place that promotes responsibility, respect, civility and academic excellence in a safe learning and teaching environment. All students, parents, teachers and staff have the right to be safe and feel safe in Ready Global Academy community. With this right comes the responsibility to be law-abiding citizens and to be accountable for actions which put the safety of others or oneself at risk. (Ready Global Academy adheres to the principles of the provincial code of behavior specified in PPM No. 128.)

Cyber-Bullying

Ready Global Academy recognizes that technology plays an important and positive role in everyone's lives, both educationally and socially. It is committed to helping all members of Ready Global Academy community to understand both the benefits and the risks, and to equip children with the knowledge and skills to be able to use technology safely and responsibly.

“Cyberbullying involves the use of information and communication technologies to support deliberate, repeated, and hostile behaviour by an individual or group that is intended to harm others.”

The complete policy is found in Ready Global Academy's policy and procedure manual.

Student Expulsion

Our school believes that all students have the right to learn and achieve success and acknowledges the impact of school climates on students' success. Our school is committed to prevention and intervention strategies to address bullying, cyber-bullying, discrimination, harassment, gender-based violence and violence in any form, whether systemic or based on individual actions of staff, students or community members that directly impact school climate through curriculum, educational programs and services. Our school has established a clear

process for reporting and responding to any behaviour that would have a negative impact on school climate. Our school's approach to making schools safer involves progressive discipline. This involves the whole school and combines discipline with opportunities for students to continue their education. Students will also have more opportunities to learn from the choices they make. Progressive discipline promotes positive student behaviour. It also enables the principal to choose the consequences that are appropriate to the student's needs and behaviour. Expelled students are removed from school for an indefinite time period. Students are suspended first, while expulsion is being considered.

The complete policy is found in Ready Global Academy's policy and procedure manual.

School Course Information

Course Outlines

Detailed course outlines have been prepared for all courses offered at our school. The outlines provide details regarding each individual course including, curriculum expectations, course content, teaching and learning strategies, along with assessment and evaluation strategies. A copy of each course outline is available through the subject teachers or the principal.

The following courses are currently available at our school:

ASM4M	Media Arts, Grade 12 University/College Preparation
AVI3M	Visual Arts, Grade 11, University Preparation
AVI4M	Visual Arts, Grade 12, University Preparation
AWQ3M	Visual Arts, Photography, Grade 11, University Preparation
AWQ4M	Visual Arts, Photography, Grade 12, University Preparation
BBB4M	International Business Fundamentals, Grade 12, University/College Preparation
BEM1O	Building the Entrepreneurial Mindset, Grade 9, Open
BEP2O	Launching and Leading a Business, Grade 10, Open
BOH4M	Business Leadership: Management Fundamentals, Grade 12, University Preparation
CGC1W	Exploring Canadian Geography, Grade 9, De-streamed
CGW4U	World Issues: A Geographic Analysis, Grade 12, University Preparation
CHC2D	Canadian History Since World War 1, Grade 10, Academic
CHI4U	Canada: History, Identity, and Culture, Grade 12, University Preparation

CHV2O	Civics and Citizenship, Grade 10, Open
CIA4U	Analysing Current Economic Issues, Grade 12, University Preparation
CLN4U	Canadian and International Law, Grade 12, University Preparation
CPW4U	Canadian and International Politics, Grade 12, University Preparation
ENL1W	English, Grade 9, De-streamed
ENG2D	English, Grade 10, Academic
ENG2P	English, Grade 10, Applied
ENG3C	English, Grade 11, College Preparation
ENG3U	English, Grade 11, University Preparation
ENG4C	English, Grade 12, College Preparation
ENG4U	English, Grade 12, University Preparation
ESLAO	English as a Second Language ESL, Level 1, Open
ESLBO	English as a Second Language ESL, Level 2, Open
ESLCO	English as a Second Language ESL, Level 3, Open
ESLDO	English as a Second Language ESL, Level 4, Open
ESLEO	English as a Second Language ESL, Level 5, Open
ETS3M	Canadian Literature, Grade 11, University/College Preparation
ETS4U	Studies in Literature, Grade 12, University Preparation
EWC4U	The Writer's Craft, Grade 12, University Preparation
GLC2O	Career Studies, Grade 10, Open
GLS1O	Learning Strategies 1: Skills for Success in Secondary School, Grade 9, Open
HFA4U	Nutrition and Health, Grade 12, University Preparation
HHG4M	Human Development throughout the Lifespan, Grade 12 University/College
HSB4U	Challenge and Change in Society, Grade 12, University Preparation

HSP3U	Introduction to Anthropology, Psychology, and Sociology, Grade 11, University Preparation
ICS3U	Introduction to Computer Science, Grade 11, University Preparation
ICS4U	Computer Science, Grade 12, University Preparation
LKMDU	International Languages, Mandarin, Level 3, University Preparation
LKBDU	International Languages, Simplified Mandarin, Level 3, University Preparation
MCR3U	Functions, Grade 11, University Preparation
MCV4U	Calculus and Vectors, Grade 12, University Preparation
MDM4U	Mathematics of Data Management, Grade 12, University Preparation
MFM2P	Foundations of Mathematics, Grade 10, Applied
MHF4U	Advanced Functions, Grade 12 University Preparation
MTH1W	Mathematics, Grade 9, De-streamed
MPM2D	Principles of Mathematics, Grade 10, Academic
NBE3U	English: Understanding Contemporary First Nations, Métis, and Inuit Voices, Grade 11, University Preparation
OLC4O	Ontario Literacy Course, Grade 12, Open
PPL1O	Healthy Active Living Education, Grade 9, Open
SBI3U	Biology, Grade 11, University Preparation
SBI4U	Biology, Grade 12, University Preparation
SCH3U	Chemistry, Grade 11, University Preparation
SCH4U	Chemistry, Grade 12, University Preparation
SNC1W	Science, Grade 9, De-streamed
SNC2D	Science, Grade 10, Academic
SPH3U	Physics, Grade 11, University Preparation
SPH4U	Physics, Grade 12, University Preparation

School Timetable

Our school provides students with flexible scheduling. All courses must be completed within 10 months of registration.

Course Description:

ASM4M - Media Arts, Grade 12 University/College Preparation

This course emphasizes the refinement of media arts skills through the creation of a thematic body of work by applying traditional and emerging technologies, tools, and techniques such as multimedia, computer animation, installation art, and performance art. Students will develop works that express their views on contemporary issues and will create portfolios suitable for use in either career or postsecondary education applications. Students will critically analyse the role of media artists in shaping audience perceptions of identity, culture, and community values.

AVI3M - Visual Arts, Grade 11, University Preparation

This course enables students to further develop their knowledge and skills in visual arts. Students will use the creative process to explore a wide range of themes through studio work that may include drawing, painting, sculpting, and printmaking, as well as the creation of collage, multimedia works, and works using emerging technologies. Students will use the critical analysis process when evaluating their own work and the work of others. The course may be delivered as a comprehensive program or through a program focused on a particular art form (e.g., photography, video, computer graphics, information design).

AVI4M - Visual Arts, Grade 12, University Preparation

This course focuses on enabling students to refine their use of the creative process when creating and presenting two- and three-dimensional art works using a variety of traditional and emerging media and technologies. Students will use the critical analysis process to deconstruct art works and explore connections between art and society. The studio program enables students to explore a range of materials, processes, and techniques that can be applied in their own art production. Students will also make connections between various works of art in personal, contemporary, historical, and cultural contexts.

AWQ3M - Visual Arts, Photography, Grade 11

This course enables students to further develop their knowledge and skills in visual arts. Students will use the creative process to explore a wide range of themes through studio work that may include drawing, painting, sculpting, and printmaking, as well as the creation of collage, multimedia works, and works using emerging technologies. Students will use the critical analysis process when evaluating their own work and the work of others. The course may be delivered as a comprehensive program or through a program focused on a particular art form (e.g., photography, video, computer graphics, information design).

AWQ4M - Visual Arts, Photography, Grade 12

This course focuses on enabling students to refine their use of the creative process when creating and presenting two- and three-dimensional art works using a variety of traditional and emerging media and technologies. Students will use the critical analysis process to deconstruct art works and explore connections between art and society. The studio program enables students to explore

a range of materials, processes, and techniques that can be applied in their own art production. Students will also make connections between various works of art in personal, contemporary, historical, and cultural contexts.

BBB4M - International Business Fundamentals, Grade 12, University/College Preparation

This course provides an overview of the importance of international business and trade in the global economy and explores the factors that influence success in international markets. Students will learn about the techniques and strategies associated with marketing, distribution, and managing international business effectively. This course prepares students for postsecondary programs in business, including international business, marketing, and management.

BEM1O - Building the Entrepreneurial Mindset, Grade 9, Open

In this course, students will learn what makes an entrepreneur thrive and the skills required to succeed in today's business environment. Students will begin to develop their own entrepreneurial mindset, and learn why it's important to take initiative, adapt to change, find creative solutions, and understand the financial considerations of entrepreneurship. This hands-on course will use business software and applications to help students plan and develop their entrepreneurial ideas and learn how to present them to a target audience. Throughout the course, students will enhance their communications skills as well as develop and refine their project management skills, including goal setting, time management, and networking.

BEP2O - Launching and Leading a Business, Grade 10, Open

This course introduces students to the world of business and what is required to be successful, ethical, and responsible in today's economy. Students will develop the knowledge and skills needed to be an entrepreneur who knows how to respond to local and global market opportunities. Throughout the course, students will explore and understand the responsibility of managing different functions of a business. This includes accounting, marketing, information and communication technology, financial management, human resources, and production.

BOH4M - Business Leadership: Management Fundamentals, Grade 12

This course focuses on the development of leadership skills used in managing a successful business. Students will analyse the role of a leader in business, with a focus on decision making, management of group dynamics, workplace stress and conflict, motivation of employees, and planning. Effective business communication skills, ethics, and social responsibility are also emphasized.

CGC1W - Exploring Canadian Geography, Grade 9, De-streamed

This course builds on learning in Grades 7 and 8 in geography. Students will explore relationships within and between Canada's natural and human systems and how they interconnect with other parts of the world. Students will also examine environmental and economic issues, and their impact related to topics such as natural resources and industries, careers, land use and responsible development, and sustainability. In addition, students will understand the connections that diverse communities and individuals have with the physical environment and each other throughout Canada, including First Nations, Métis, and Inuit perspectives. Students will apply geographic thinking, use the geographic inquiry process, and use geospatial technologies throughout their investigations.

CGW4U - World Issues: A Geographic Analysis, Grade 12

In this course, students will address the challenge of creating a more sustainable and equitable world. They will explore issues involving a wide range of topics, including economic disparities, threats to the environment, globalization, human rights, and quality of life, and will analyse government policies, international agreements, and individual responsibilities relating to them. Students will apply the concepts of geographic thinking and the geographic inquiry process, including the use of spatial technologies, to investigate these complex issues and their impact on natural and human communities around the world

CHC2D - Canadian History Since World War 1, Grade 10, Academic

This course explores social, economic, and political developments and events and their impact on the lives of different individuals, groups, and communities, including First Nations, Métis, and Inuit individuals and communities, in Canada since 1914. Students will examine the role of conflict and cooperation in Canadian society, Canada's evolving role within the global community, and the impact of various individuals, organizations, and events on identities, citizenship, and heritage in Canada. Students will develop an understanding of some of the political developments and government policies that have had a lasting impact on First Nations, Métis, and Inuit individuals and communities. They will develop their ability to apply the concepts of historical thinking and the historical inquiry process, including the interpretation and analysis of evidence, when investigating key issues and events in Canadian history since 1914.

CHI4U - Canada: History, Identity, and Culture, Grade 12, University Preparation

This course traces the history of Canada, with a focus on the evolution of our national identity and culture as well as the identity and culture of various groups that make up Canada. Students will explore various developments and events, both national and international, from precontact to the present, and will examine various communities in Canada and how they have contributed to identity and heritage in Canada. Students will investigate the development of culture and identity, including national identity, in Canada and how and why they have changed throughout the country's history. They will extend their ability to apply the concepts of historical thinking and the historical inquiry process, including the interpretation and analysis of evidence, as they investigate the people, events, and forces that have shaped Canada.

CHV2O - Civics and Citizenship, Grade 10, Open

This course explores rights and responsibilities associated with being an active citizen in a democratic society. Students will explore issues of civic importance and the influence of social media, while developing their understanding of the role of civic engagement and of political processes in the local, national, and/or global community. Students will apply the concepts of political thinking and the political inquiry process to investigate, and express informed opinions about, a range of political issues and developments that are both of significance in today's world and of personal interest to them. This course also includes learning on digital literacy and critical-thinking skills, the mechanisms of government, Indigenous governance systems and structures, the historical foundations of the rights and freedoms we enjoy in Canada, ways in which government policy affects individuals' lives and the economy, and ways for students to serve their communities.

CIA4U - Analysing Current Economic Issues, Grade 12, University Preparation

This course examines current Canadian and international economic issues, developments, policies, and practices from diverse perspectives. Students will explore the decisions that individuals and institutions, including governments, make in response to economic issues such as globalization, trade agreements, economic inequalities, regulation, and public spending. Students will apply the concepts of economic thinking and the economic inquiry process, as well as economic models and theories, to investigate, and develop informed opinions about, economic trade-offs, growth, and sustainability and related economic issues.

CLN4U - Canadian and International Politics, Grade 12, University Preparation

This course explores various perspectives on issues in Canadian and world politics. Students will explore political decision making and ways in which individuals, stakeholder groups, and various institutions, including governments, multinational corporations, and non-governmental organizations, respond to and work to address domestic and international issues. Students will apply the concepts of political thinking and the political inquiry process to investigate issues, events, and developments of national and international political importance, and to develop and communicate informed opinions about them.

CPW4U - Canadian and International Politics, Grade 12, University Preparation

This course explores various perspectives on issues in Canadian and world politics. Students will explore political decision making and ways in which individuals, stakeholder groups, and various institutions, including governments, multinational corporations, and non-governmental organizations, respond to and work to address domestic and international issues. Students will apply the concepts of political thinking and the political inquiry process to investigate issues, events, and developments of national and international political importance, and to develop and communicate informed opinions about them.

ENL1W - English, Grade 9, De-streamed

This course enables students to continue to develop and consolidate the foundational knowledge and skills that they need for reading, writing, and oral and visual communication. Throughout the course, students will continue to enhance their media literacy and critical literacy skills, and to develop and apply transferable skills, including digital literacy. Students will also make connections to their lived experiences and to society and increase their understanding of the importance of language and literacy across the curriculum.

Prerequisite: None

ENG2D - English, Grade 10, Academic

This course is designed to extend the range of oral communication, reading, writing, and media literacy skills that students need for success in their secondary school academic programs and in their daily lives. Students will analyse literary texts from contemporary and historical periods, interpret and evaluate informational and graphic texts, and create oral, written, and media texts in a variety of forms. An important focus will be on the selective use of strategies that contribute to effective communication. This course is intended to prepare students for the compulsory Grade 11 university or college preparation course.

ENG2P - English, Grade 10, Applied

This course is designed to extend the range of oral communication, reading, writing, and media literacy skills that students need for success in secondary school and daily life. Students will

study and create a variety of informational, literary, and graphic texts. An important focus will be on the consolidation of strategies and processes that help students interpret texts and communicate clearly and effectively. This course is intended to prepare students for the compulsory Grade 11 college or workplace preparation course.

ENG3C - English, Grade 11, College Preparation

This course emphasizes the development of literacy, communication, and critical and creative thinking skills necessary for success in academic and daily life. Students will study the content, form, and style of a variety of informational and graphic texts, as well as literary texts from Canada and other countries, and create oral, written, and media texts in a variety of forms for practical and academic purposes. An important focus will be on using language with precision and clarity. The course is intended to prepare students for the compulsory Grade 12 college preparation course.

ENG3U - English, Grade 11, University Preparation

This course emphasizes the development of literacy, communication, and critical and creative thinking skills necessary for success in academic and daily life. Students will analyse challenging literary texts from various periods, countries, and cultures, as well as a range of informational and graphic texts, and create oral, written, and media texts in a variety of forms. An important focus will be on using language with precision and clarity and incorporating stylistic devices appropriately and effectively. The course is intended to prepare students for the compulsory Grade 12 university or college preparation course.

ENG4C - English, Grade 12, College Preparation

This course emphasizes the consolidation of literacy, communication, and critical and creative thinking skills necessary for success in academic and daily life. Students will analyse a variety of informational and graphic texts, as well as literary texts from various countries and cultures, and create oral, written, and media texts in a variety of forms for practical and academic purposes. An important focus will be on using language with precision and clarity and developing greater control in writing. The course is intended to prepare students for college or the workplace.

ENG4U - English, Grade 12, University Preparation

This course emphasizes the consolidation of the literacy, communication, and critical and creative thinking skills necessary for success in academic and daily life. Students will analyse a range of challenging literary texts from various periods, countries, and cultures; interpret and evaluate informational and graphic texts; and create oral, written, and media texts in a variety of forms. An important focus will be on using academic language coherently and confidently, selecting the reading strategies best suited to particular texts and particular purposes for reading, and developing greater control in writing. The course is intended to prepare students for university, college, or the workplace.

ESLAO - English as a Second Language ESL, Level 1, Open

This course builds on students' previous education and language knowledge to introduce them to the English language and help them adjust to the diversity in their new environment. Students will use beginning English language skills in listening, speaking, reading, and writing for everyday and essential academic purposes. They will engage in short conversations using basic English language structures and simple sentence patterns; read short adapted texts; and write

phrases and short sentences. The course also provides students with the knowledge and skills they need to begin to adapt to their new lives in Canada.

ESLBO - English as a Second Language ESL, Level 2, Open

This course extends students' listening, speaking, reading, and writing skills in English for everyday and academic purposes. Students will participate in conversations in structured situations on a variety of familiar and new topics; read a variety of texts designed or adapted for English language learners; expand their knowledge of English grammatical structures and sentence patterns; and link English sentences to compose paragraphs. The course also supports students' continuing adaptation to the Ontario school system by expanding their knowledge of diversity in their new province and country.

ESLCO - English as a Second Language ESL, Level 3, Open

This course further extends students' skills in listening, speaking, reading, and writing in English for a variety of everyday and academic purposes. Students will make short classroom oral presentations; read a variety of adapted and original texts in English; and write using a variety of text forms. As well, students will expand their academic vocabulary and their study skills to facilitate their transition to the mainstream school program. This course also introduces students to the rights and responsibilities inherent in Canadian citizenship, and to a variety of current Canadian issues.

ESLDO - English as a Second Language ESL, Level 4, Open

This course prepares students to use English with increasing fluency and accuracy in classroom and social situations and to participate in Canadian society as informed citizens. Students will develop the oral presentation, reading, and writing skills required for success in all school subjects. They will extend listening and speaking skills through participation in discussions and seminars; study and interpret a variety of grade-level texts; write narratives, articles, and summaries in English; and respond critically to a variety of print and media texts.

ESLEO - English as a Second Language ESL, Level 5, Open

This course provides students with the skills and strategies they need to make the transition to college and university preparation courses in English and other secondary school disciplines. Students will be encouraged to develop independence in a range of academic tasks. They will participate in debates and lead classroom workshops; read and interpret literary works and academic texts; write essays, narratives, and reports; and apply a range of learning strategies and research skills effectively. Students will further develop their ability to respond critically to print and media texts.

ETS3M - Canadian Literature, Grade 11, University/College Preparation

This course emphasizes the study and analysis of literary texts by Canadian authors for students with a special interest in Canadian literature. Students will study the themes, forms, and stylistic elements of a variety of literary texts representative of various time periods and of the diverse cultures and regions of Canada, and will respond personally, critically, and creatively to them.

ETS4U - Studies in Literature, Grade 12, University Preparation

This course is for students with a special interest in literature and literary criticism. The course may focus on themes, genres, time periods, or countries. Students will analyse a range of forms

and stylistic elements of literary texts and respond personally, critically, and creatively to them. They will also assess critical interpretations, write analytical essays, and complete an independent study project.

EWC4U - The Writer's Craft, Grade 12, University Preparation

This course emphasizes knowledge and skills related to the craft of writing. Students will analyse models of effective writing; use a workshop approach to produce a range of works; identify and use techniques required for specialized forms of writing; and identify effective ways to improve the quality of their writing. They will also complete a major paper as part of a creative or analytical independent study project and investigate opportunities for publication and for writing careers.

GLC2O - Career Studies, Grade 10, Open

This course gives students the opportunity to develop the skills, knowledge, and habits that will support them in their education and career/life planning. Students will learn about global work trends, and seek opportunities within the school and community to expand and strengthen their transferable skills and their ability to adapt to the changing world of work. On the basis of exploration, reflective practice, and decision-making processes, students will make connections between their skills, interests, and values and their post-secondary options, whether in apprenticeship training, college, community living, university, or the workplace. They will set goals and create a plan for their first postsecondary year. As part of their preparation for the future, they will learn about personal financial management – including the variety of saving and borrowing tools available to them and how to use them to their advantage – and develop a budget for their first year after secondary school.

GLS1O - Learning Strategies 1: Skills for Success in Secondary School, Grade 9, Open

This course gives students the opportunity to develop the skills, knowledge, and habits that will support them in their education and career/life planning. Students will learn about global work trends, and seek opportunities within the school and community to expand and strengthen their transferable skills and their ability to adapt to the changing world of work. On the basis of exploration, reflective practice, and decision-making processes, students will make connections between their skills, interests, and values and their postsecondary options, whether in apprenticeship training, college, community living, university, or the workplace. They will set goals and create a plan for their first postsecondary year. As part of their preparation for the future, they will learn about personal financial management – including the variety of saving and borrowing tools available to them and how to use them to their advantage – and develop a budget for their first year after secondary school.

HFA4U - Nutrition and Health, Grade 12, University Preparation

This course examines the relationships between food, energy balance, and nutritional status; the nutritional needs of individuals at different stages of life; and the role of nutrition in health and disease. Students will evaluate nutrition-related trends and will determine how food choices can promote food security and environmental responsibility. Students will learn about healthy eating, expand their repertoire of food-preparation techniques, and develop their social science research skills by investigating issues related to nutrition and health.

HHG4M - Human Development throughout the Lifespan, Grade 12 University/College

This course offers a multidisciplinary approach to the study of human development throughout the lifespan. Students will learn about a range of theoretical perspectives on human development. They will examine threats to healthy development as well as protective factors that promote resilience. Students will learn about physical, cognitive, and social-emotional development from the prenatal period through old age and will develop their research and inquiry skills by investigating issues related to human development.

HSB4U - Challenge and Change in Society, Grade 12, University Preparation

This course focuses on the use of social science theories, perspectives, and methodologies to investigate and explain shifts in knowledge, attitudes, beliefs, and behaviour and their impact on society. Students will critically analyse how and why cultural, social, and behavioural patterns change over time. They will explore the ideas of social theorists and use those ideas to analyse causes of and responses to challenges such as technological change, deviance, and global inequalities. Students will explore ways in which social science research methods can be used to study social change.

HSP3U – Intro to Anthropology, Psychology, & Sociology, Grade 11, University Prep

This course introduces students to theories, questions, and issues related to anthropology, psychology, and sociology. Students learn about approaches and research methods used by social scientists. Students will be given opportunities to apply theories from a variety of perspectives, to conduct social science research, and to become familiar with current issues within the three disciplines.

ICS3U - Introduction to Computer Science, Grade 11, University Preparation

This course introduces students to computer science. Students will design software independently and as part of a team, using industry-standard programming tools and applying the software development life-cycle model. They will also write and use subprograms within computer programs. Students will develop creative solutions for various types of problems as their understanding of the computing environment grows. They will also explore environmental and ergonomic issues, emerging research in computer science, and global career trends in computer-related fields.

ICS4U - Computer Science, Grade 12, University Preparation

This course enables students to further develop knowledge and skills in computer science. Students will use modular design principles to create complex and fully documented programs, according to industry standards. Student teams will manage a large software development project, from planning through to project review. Students will also analyse algorithms for effectiveness. They will investigate ethical issues in computing and further explore environmental issues, emerging technologies, areas of research in computer science, and careers in the field.

LKMDU - International Languages, Mandarin, Level 3, University Preparation

This course provides extended opportunities for students to communicate and interact in the language of study in a variety of social and academic contexts. Students will refine and enhance their listening, speaking, reading, and writing skills, as well as their creative and critical thinking skills, as they explore and respond to a variety of oral and written texts, including complex authentic and adapted texts. They will also broaden their understanding and appreciation of

diverse communities where the language is spoken and develop skills necessary for lifelong language learning.

LKBDU - International Languages, Simplified Mandarin, Level 3, University Preparation

This course provides extended opportunities for students to communicate and interact in the language of study in a variety of social and academic contexts. Students will refine and enhance their listening, speaking, reading, and writing skills, as well as their creative and critical thinking skills, as they explore and respond to a variety of oral and written texts, including complex authentic and adapted texts. They will also broaden their understanding and appreciation of diverse communities where the language is spoken and develop skills necessary for lifelong language learning.

MCR3U - Functions, Grade 11, University Preparation

This course introduces the mathematical concept of the function by extending students' experiences with linear and quadratic relations. Students will investigate properties of discrete and continuous functions, including trigonometric and exponential functions; represent functions numerically, algebraically, and graphically; solve problems involving applications of functions; investigate inverse functions; and develop facility in determining equivalent algebraic expressions. Students will reason mathematically and communicate their thinking as they solve multi-step problems.

MCV4U - Calculus and Vectors, Grade 12, University Preparation

This course builds on students' previous experience with functions and their developing understanding of rates of change. Students will solve problems involving geometric and algebraic representations of vectors and representations of lines and planes in three-dimensional space; broaden their understanding of rates of change to include the derivatives of polynomial, sinusoidal, exponential, rational, and radical functions; and apply these concepts and skills to the modelling of real-world relationships. Students will also refine their use of the mathematical processes necessary for success in senior mathematics. This course is intended for students who choose to pursue careers in fields such as science, engineering, economics, and some areas of business, including those students who will be required to take a university-level calculus, linear algebra, or physics course.

MDM4U - Mathematics of Data Management, Grade 12, University Preparation

This course broadens students' understanding of mathematics as it relates to managing data. Students will apply methods for organizing and analysing large amounts of information; solve problems involving probability and statistics; and carry out a culminating investigation that integrates statistical concepts and skills. Students will also refine their use of the mathematical processes necessary for success in senior mathematics. Students planning to enter university programs in business, the social sciences, and the humanities will find this course of particular interest.

MFM2P - Foundations of Mathematics, Grade 10, Applied

This course enables students to consolidate their understanding of linear relations and extend their problem-solving and algebraic skills through investigation, the effective use of technology, and hands-on activities. Students will develop and graph equations in analytic geometry; solve and apply linear systems, using real-life examples; and explore and interpret graphs of quadratic

relations. Students will investigate similar triangles, the trigonometry of right triangles, and the measurement of three-dimensional figures. Students will consolidate their mathematical skills as they solve problems and communicate their thinking.

MHF4U - Advanced Functions, Grade 12 University Preparation

This course extends students' experience with functions. Students will investigate the properties of polynomial, rational, logarithmic, and trigonometric functions; develop techniques for combining functions; broaden their understanding of rates of change; and develop facility in applying these concepts and skills. Students will also refine their use of the mathematical processes necessary for success in senior mathematics. This course is intended both for students taking the Calculus and Vectors course as a prerequisite for a university program and for those wishing to consolidate their understanding of mathematics before proceeding to any one of a variety of university programs.

MTH1W – Mathematics, Grade 9, De-streamed

This course enables students to consolidate, and continue to develop, an understanding of mathematical concepts related to number sense and operations, algebra, measurement, geometry, data, probability, and financial literacy. Students will use mathematical processes, mathematical modelling, and coding to make sense of the mathematics they are learning and to apply their understanding to culturally responsive and relevant real-world situations. Students will continue to enhance their mathematical reasoning skills, including proportional reasoning, spatial reasoning, and algebraic reasoning, as they solve problems and communicate their thinking.

MPM2D - Principles of Mathematics, Grade 10, Academic

This course enables students to broaden their understanding of relationships and extend their problem-solving and algebraic skills through investigation, the effective use of technology, and abstract reasoning. Students will explore quadratic relations and their applications; solve and apply linear systems; verify properties of geometric figures using analytic geometry; and investigate the trigonometry of right and acute triangles. Students will reason mathematically and communicate their thinking as they solve multi-step problems.

NBE3U - English: Understanding Contemporary First Nations, Métis, and Inuit Voices, Grade 11, University Preparation

This course explores the themes, forms, and stylistic elements of a variety of literary, informational, graphic, oral, cultural, and media text forms emerging from First Nations, Métis, and Inuit cultures in Canada, and also examines the perspectives and influence of texts that relate to those cultures. In order to fully understand contemporary text forms and their themes of identity, relationship, and self-determination, sovereignty, or self-governance, students will analyse the changing use of text forms by Indigenous authors/creators from various periods and cultures in expressing ideas related to these themes. Students will also create oral, written, and media texts to explore their own ideas and understanding, focusing on the development of literacy, communication, and critical and creative thinking skills necessary for success in academic and daily life. The course is intended to prepare students for the compulsory Grade 12 English university or college preparation course.

OLC4O - Ontario Literacy Course, Grade 12, Open

This course is designed to help students acquire and demonstrate the cross-curricular literacy skills that are evaluated by the Ontario Secondary School Literacy Test (OSSLT). Students who complete the course successfully will meet the provincial literacy requirement for graduation. Students will read a variety of informational, narrative, and graphic texts and will produce a variety of forms of writing, including summaries, information paragraphs, opinion pieces, and news reports. Students will also maintain and manage a portfolio containing a record of their reading experiences and samples of their writing.

PPL10 - Healthy Active Living Education, Grade 9, Open

This course emphasizes regular participation in a variety of enjoyable physical activities that promote lifelong healthy active living. Students will learn movement skills and principles, ways to improve personal fitness and physical competence, and safety and injury prevention. They will investigate issues related to healthy sexuality and the use and abuse of alcohol, tobacco, and other drugs, and will participate in activities designed to develop goal setting, communication, and social skills.

SBI3U - Biology, Grade 11, University Preparation

This course furthers students' understanding of the processes that occur in biological systems. Students will study theory and conduct investigations in the areas of biodiversity; evolution; genetic processes; the structure and function of animals; and the anatomy, growth, and function of plants. The course focuses on the theoretical aspects of the topics under study, and helps students refine skills related to scientific investigation.

SBI4U - Biology, Grade 12, University Preparation

This course provides students with the opportunity for in-depth study of the concepts and processes that occur in biological systems. Students will study theory and conduct investigations in the areas of biochemistry, metabolic processes, molecular genetics, homeostasis, and population dynamics. Emphasis will be placed on the achievement of detailed knowledge and the refinement of skills needed for further study in various branches of the life sciences and related fields.

SCH3U - Chemistry, Grade 11, University Preparation

This course enables students to deepen their understanding of chemistry through the study of the properties of chemicals and chemical bonds; chemical reactions and quantitative relationships in those reactions; solutions and solubility; and atmospheric chemistry and the behaviour of gases. Students will further develop their analytical skills and investigate the qualitative and quantitative properties of matter, as well as the impact of some common chemical reactions on society and the environment.

SCH4U - Chemistry, Grade 12, University Preparation

This course enables students to deepen their understanding of chemistry through the study of organic chemistry, the structure and properties of matter, energy changes and rates of reaction, equilibrium in chemical systems, and electrochemistry. Students will further develop their problem-solving and investigation skills as they investigate chemical processes and will refine their ability to communicate scientific information. Emphasis will be placed on the importance of chemistry in everyday life and on evaluating the impact of chemical technology on the environment.

SNC1W - Science, Grade 9, De-streamed

This course enables students to develop their understanding of concepts related to biology, chemistry, physics, and Earth and space science, and to relate science to technology, society, and the environment. Throughout the course, students will develop and refine their STEM skills as they use scientific research, scientific experimentation, and engineering design processes to investigate concepts and apply their knowledge in situations that are relevant to their lives and communities. Students will continue to develop transferable skills as they become scientifically literate global citizens.

SNC2D - Science, Grade 10, Academic

This course enables students to enhance their understanding of concepts in biology, chemistry, earth and space science, and physics, and of the interrelationships between science, technology, society, and the environment. Students are also given opportunities to further develop their scientific investigation skills. Students will plan and conduct investigations and develop their understanding of scientific theories related to the connections between cells and systems in animals and plants; chemical reactions, with a particular focus on acid–base reactions; forces that affect climate and climate change; and the interaction of light and matter.

SPH3U - Physics, Grade 11, University Preparation

This course develops students' understanding of the basic concepts of physics. Students will explore kinematics, with an emphasis on linear motion; different kinds of forces; energy transformations; the properties of mechanical waves and sound; and electricity and magnetism. They will enhance their scientific investigation skills as they test laws of physics. In addition, they will analyse the interrelationships between physics and technology and consider the impact of technological applications of physics on society and the environment.

SPH4U - Physics, Grade 12, University Preparation

This course enables students to deepen their understanding of physics concepts and theories. Students will continue their exploration of energy transformations and the forces that affect motion, and will investigate electrical, gravitational, and magnetic fields and electromagnetic radiation. Students will also explore the wave nature of light, quantum mechanics, and special relativity. They will further develop their scientific investigation skills, learning, for example, how to analyse, qualitatively and quantitatively, data related to a variety of physics concepts and principles. Students will also consider the impact of technological applications of physics on society and the environment.

Online Components

Minimum Hardware Requirements:

Learners participating in on-line courses should have access to hardware that meets or exceeds the following standards. Students with access to equipment that does not meet these standards may experience slow interactivity; limited interactions and/or long wait periods for file downloads. To access and successfully complete courses online, you must have the following:

- Access to the internet
- Word, PPT, Excel (or similar) processing software
- PDF editing software
- Printer (for some courses)

- Scanner (for some courses)
- Webcam, Microphone and Headphones/Speaker
- Ability to download, install and run some software (for some courses)

Additional Software: Some courses may require access to some OSAPAC software, specifically at this time, Geometer's Sketchpad, Simply Accounting or Smart Ideas. It is recommended that up-to-date virus, spyware, and adware protection be implemented.

Online Attendance:

Regular attendance in any learning environment is vital to school success. Students who do not participate in their online course regularly will diminish their learning experience. The following processes have been put into place to encourage regular attendance by the student:

- The principal will maintain attendance records as it is expected that students and teachers should login to their course on a regular basis
- Due to the continuous in-take entry and exit model of online education, there is no prescribed yearly or even semesterized calendar.
- Students are expected to login to their online course at minimum three times in a single week, or an absence will be recorded on their report card.
- Students who leave a course before completion must communicate their intentions either in writing to the principal or teacher in the interest of up-to-date record keeping, before any request can be acted upon
- To encourage attendance, the principal will work with the curriculum writers, to set manageable assessment and evaluation assignments early in the course, in order to give the student positive feedback and breakdown any existing technology barriers
- Students who have not completed their course within 10 months from the day of enrollment in that course, will be unenrolled from the course.

Acceptable Use Policy:

The school reserves the right to monitor all material in user accounts on the file server in order to determine the appropriateness of computer use when a challenge has arisen. The following processes have been put into place:

The Moodle Learning Management System at our school is intended for educational purposes only. Any use of any Learning Management System (LMS) tool within a course for any other purpose other than the intended educational purpose is prohibited. The inappropriate uses include, but are not limited to, criminal, obscene, commercial, or illegal purposes.

- Student access into the LMS is provided as long as the student follows the guidelines set by the school Principal, provincial, and federal laws
- If the LMS is used inappropriately or in a prohibited manner, the principal reserves the right to terminate the registration or suspend the user. There is the possibility of further disciplinary action including legal prosecution, if the appropriate laws, regulations, or contracts deem it necessary
- Malicious LMS network damage; interference or mischief will be reported to the appropriate authorities

- It is important to be aware that activities in an online environment are not private
- The school reserves the right to monitor all material that is placed in a user's account and to remove it if deemed necessary

The security of the online environment is only as effective as the practices of its users. Therefore, it is important that the student user:

- Never reveal your password to your course to any individual (except your parents/guardians)
- Immediately report to your principal any email or chat message which causes you concern or any message which requests inappropriate personal information from you
- Never attempt to access unauthorized material or to impersonate another user
- Any attempt to vandalize, harm or destroy data of another user is prohibited
- Any attempt to vandalize the data of the course or school is also prohibited
